

General Motors®: 6.5L Diesel Engine featuring a NEW long block.

ISSUE: 6.5L-NEW-A

A UNIQUE OPPORTUNITY

NPD is now supplying a NEW long block with tin direct from General Engine Parts (GEP), a division of AM General who continues to supply the US Military with this same engine for their Humvee units. Because quality is so vital to our company, we are no longer willing to live with the design flaws of the original engine.

Our good intentions of providing a better long block engine in the past with new blocks and new heads have not been sustainable, in either reliability or availability, leading NPD to provide the best solution now available: NEW Long Block with Zero reclaimed parts.

The Complete Drop-In will also be built utilizing this NEW long block.

LONG BLOCK SUPREME CONFIGURATION

NPD's Long Block Supreme configuration is comparable to a "complete" engine offered by original equipment manufacturers and other engine remanufacturers. NPD is now supplying the same NEW engine as supplied to the US Military.
